Meeting Minutes

- Sprint Planning (goal, user stories selected, tasks)

Sprint Goal:

Our goal for Sprint 1 was to create a strong foundation for our project, TutorCircle, by understanding the project requirements, using the main features to build all assignment aspects, and dividing responsibilities among all six team members.

User Stories:

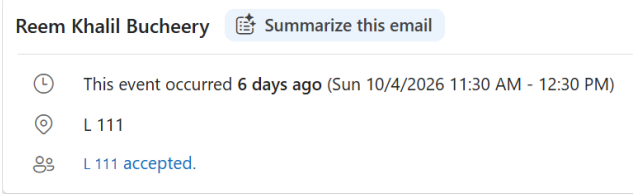

Haya was assigned to develop the preliminary user stories and identify the different user roles within TutorCircle. All user stories come from the foundation features provided by the project's pdf.

Task Breakdown and Responsibilities:

- **Reem (Scrum Master):** GitHub repository setup, Kanban board management, meeting minutes, and Scrum Master documentation.
- **Hashem:** Functional and non-functional requirements and sprint retrospective.
- **Haya:** Preliminary user stories and user roles.
- **Noor:** Wireframe design.
- **Latifa:** High-level system architecture design.
- **Mariam:** Code and review.

- Daily Stand-ups

Stand-up (1)

Date: 4 October 2026
Duration: 30 minutes
Attendees: All six team members
Meeting Type: Initial Project Discussion

Meeting Objective:

The meeting's objective was to read and review the assignment's requirements. As well as understand the TutorCircle project before beginning the work.

Discussion:

- Read and reviewed Assignment 1's rubric and requirements.

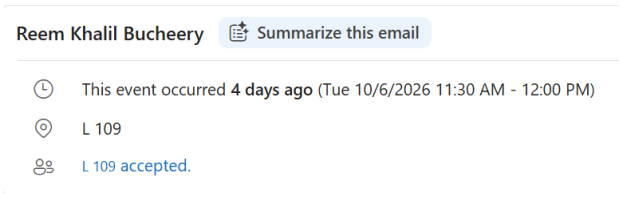

- Read through the TutorCircle project description and discussed its main features for the project.
- Everyone brainstormed initial ideas for the first phase of the project.
- No tasks were assigned during this meeting, because the focus was on understanding the assignment itself.

Decisions Made:

- Our team agreed to assign tasks next meeting.
- Our team agreed on asking Dr. Shirazi all the confusing requirements that were not clear on our end.

Obstcales Faced:

Some project requirements were unclear, making it difficult to determine how to begin the project. The team decided to seek clarification from Dr. Shirazi.

Stand-up (2)	

Date: 6 October 2026

Duration: 30 minutes
Attendees: All six team members
Meeting Type: Team Roles and Task Distribution

Meeting Objective:

This meeting's objective was to assign the tasks and roles amongest all six members.

Discussion:

- Discussed the tasks required to complete Sprint 1.
- Assigned roles and responsibilities to each team member. Made sure all work was divided fairly.

Decisions Made:

- Our team agreed on the division of responsibilities made.
- Our team wanted to present the task distribution to Dr. Shirazi for approval and to make sure that we are on the right path.

Obstcales Faced:

No new obstcales were faced during this meeting.

Stand-up (3)	**In-Class Meeting with Dr.Shirazi**

Date: 8 October 2026
Duration: 15 minutes
Attendees: All six team members and Dr. Shirazi
Meeting Type: Project Clarification and Task Approval

Meeting Objective

This meeting's objective was to clarify the project requirements and receive approval for the team's assigned responsibilities by Dr. Shirazi.

Discussion

- Had a fast meeting with Dr. Shirazi to show her our task distribution.
- Asked questions regarding the project details to ensure all team members understood the requirements of this assignment.
- Asked for confirmation that our team was working in the correct direction.

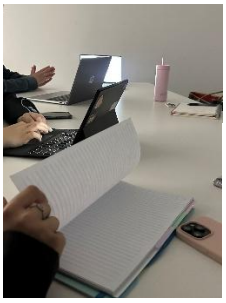

Decisions Made

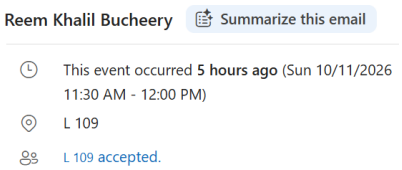

- Dr. Shirazi reviewed and approved all six members' assigned tasks.
- Our team agreed that this is a good starting point to begin working on our tasks.
- The initial confusion regarding project requirements that we had were all answered by Dr. Shirazi and we had a clear picture of what we should and should not do.

Obstcales Faced:

No new obstcales were reported during this meeting.

Stand-up (4)

Date: 11 October 2026
Duration: 30mins
Attendees: All six team members
Meeting Type: Team Progress Review and Sprint Coordination

Meeting Objective

This meeting's objective was to review each team member's individual progress, provide needed feedback, and discuss the remaining tasks and submission requirements for Assignment 1.

Discussion

- I, Scrum Master, reviewed each team member's work to check their progress and ensured that the tasks were being completed correctly to our vision.

- All team members participated in the discussion by providing comments, feedback, and recommendations on each other's work. This raised motivation among all team members.
- Discussed the remaining steps of the assignment and the submission format needed by each member.
- I, Scrum Master, made sure that all team members understood the individual reflection requirements and page limit before submission.
- Our team discussed regularly updating the GitHub repository with commits for reflection evidence.

Decisions Made

- Our team agreed that each member will complete their assigned tasks before copying the docx document and writing their own reflection for part 2 of the assignment.
- Our team members agreed to go back and use the feedback given to improve the work done.

Obstcales Faced:

No obstacles faced during this meeting, and we considered this to be the most successful meeting so far.
